ON GRANITE MOUNTAIN

Report of the Officers of the Great Silver-Producing Mine.

FOR AN ANNUAL ELECTION

Preparing to Vote for Trustees of the Granite Mountain Company - Mines in Butte.

Special Correspondence of the Standard. GRANITE, Mont., May 14.- The annual election of trustees for the Granite Mountain Mining company takes place at Gran-ite this month. This is done to comply with a state law, and is really only a mat-ter of form, as the election of officers takes place at the home office in St. Louis, Mo., some time after July 31. Just at this time a report of what this company did last year might be of interest to the public and the following items are clipped from a report of President Rumsey: "There has been mined and milled a greater quantity of ore, by nearly 9,000 tons, during the year ending July 31, 1891, than was mined, milled and shipped to smelters during the previous year, but the number of ounces of fine silver and gold were less by 798,175 of silver and 2,312 ounces of fine gold. The entire amount received for all the gold and silver bullion produced by the company during the fiscal year is \$3,473,124, at an average of \$1.0405 for silver per ounce, and \$20,60 for gold per ounce. The entire \$20.60 for gold per ounce. The entire amount for all the gold and silver bullion produced by this company the previous year was \$3,839,655. Excess of gross receipts for the year ending July 31, 1890, over the gross receipts for the year ending July 31, 1891, is \$366,531.

Dividends paid during the year ending July 31, 1891, \$1,900,000. Dividends paid during the year 1800, \$2,500,000.

The average assay in silver of all the ore crushed during the last fiscal year was 50.59 ounces per ton. The average assay of the ore crushed the previous year was 70.94 ounces per ton. This accounts in part for this year's product or net re-turn being less than the previous year's. The company now have title to a block of mining claims between Granite and Rumsey covering some 1,100 acres. Three prominent quartz veins outcrop in these claims between Rumsey and the Great Granite fissure, making four important true fissure veins owned by this company and covering over 39,999 lineal feet, as fol-

Claims on Granite vein
Cleveland vein
Fred Barr Falls vein
Conyon-Isabella vein... 3,300 7,000 8,500

But little development work has yet been done on the three last named veins, but their showing is even better than was the Granite vein with similar development. The representation work shows many other less prominent veins in the 1,100acre block above mentioned.

A tunnel is being driven from Rumsey to Granite for the purpose of developing all of the above important quartz deads, as well as for the purpose of draining the Granite vein. This tunnel will cut the Fred Burr Falls vein 914 feet below the surface, will cut the Cleveland vein 978 feet below the surface, and the Canyon-Isabella vein at a depth of 892 feet below the surface, and connect with the Granite vein at Ruby shaft at a depth of 1,242 feet below the collar of the shaft. The location of the tun-nel is nearly central with reference to the block of ground to be developed. Its mouth is so situated that the water from the tunnel can be run into the pans and settlers and the ore run into the ore bins above the

C mill at Rumsey. The company's property in the vicinity of Granite and Rumsey is as follows; No. of mineral claims, 190; No. of mill sites, 8; ranches with water rights, 1,200 acres. The company now has a revenue of per month, from remals for ground tenements and water rights, and this source of income is increasing monthly."

The treasurer's report shows that the company value their property, including a cash balance on hand and bullion unsold, at \$11,815,156.67. From Superintendent Weir's report the information is obtained that the average cost of mining ore per ton for the past year was \$5,73 and the average cost of milling ore per ton was \$10. Mr. Weir also says: "No. 13 cast shows conclusively that this level is under the Granite horse. The cross cut at No. 17 wili open up 400 of virgin ground." Without any doubt the reports this year will be more flattering than the above, and yet none of the three great veins spoken of in the above report have been touched. The Granite company have only got fairly under way developing their claims, instead of being worked out, as claimed by

AMONG RETTE MINES.

About That Rich Strike Recently Made in the Alice.

BUTTE, May 15,-The Alice company's valuable mining properties at Walkerville were never looking more favorable than now. The strike made on the 1,400-foot level in the Alice a few days ago, continues to grow in richness, and the ore body is gradually increasing in size. An assay made yesterday showed nearly 70 ounces in silver. In addition to this a rich strike in silver. In addition to this a rich strike has just been made on a slope from the 400-foot level of the Magna Charta. None of the ore runs less than 60 ounces, and samples of it are shown which run 200 ounces and over. The Magna Charta is full of good ore, and with silver at anything like a good price it would be extensively worked. As it is now only a small force is employed. The Blue Wing, the Alice company's smallest but most valuable property, is being worked only by a day shift of eight men. The force in the Alice has been largely increased on account of the recent rich strike and it will be added to again during the week.

ing the week.

Superintendent Hal seems to be of the opinion that the clouds which are now hanging over the mines of the Northwest have a silver lining, for he is preparing to start up the remaining 30 stamps in the 60-stamp mill at an early date. Men have been at work on them ever since the 20-stamp mill was shot down and will have them in the shut down and will have them in a thor-ough state of repair by next Thursday, and on the following day the 60 stamps will all on the following day the 60 stamps will all be dropping on ore from the Alice and Magna Charta and possibly a little from the Blue Wing. But this is not all: The 20-stamp mill is also being overhauled and repaired, and if silver gets anywhere above 90 cents, that too will be started up and every man who has been laid off will be put back to work again. This is exceedingly good news for both Walkerville and Butte, and Superintendent Hall is deserving of the thanks of the

community for doing all in his power to relieve the depression in silver mining caused by the moneyed gold bugs of the East.

The Ophir mine south of the city has been equipped with a new and improved hoisting plant and cage, and a pump manufactured by the Barr Pump & Engine company of Philadeiphia, which is the only one of its kind in the camp. The pump, which is a 16 by 7 by 12 double cylinder duplex, is located at the 390 station. It is capable of raising water 1.000 feet and clears the sump in 20 minutes. The new hoisting engine is of the double cylinder pattern, 12 by 16, with a 60-inch drum. Its capacity is 1.000 feet and it now has 490 feet of one-inch cable. A new 60-horse power boiler has also been put in. Ore is now being taken from the 200 level. The 300 level has just been reached and men are now drifting south to strike the two leads.

Matters in Park canyon are looking

are now drifting south to strike the two leads.

Matters in Park canyon are looking more encouraging then they have for several years. A 300-foot shaft is being sunk in the tunnel of the Major Budd, with heavy machinery specially ordered for the work. Adjoining the Major Budd is the Stumbling Block claim, on which Con Suillivan has just commenced to sink a 300-foot shaft, the contract for which was let to him a few days ago by J. A. Brent, the manager of the property, which is owned by the Indiana Mining company. On his own mine, the Homestake, Mr. Sullivan has a shaft down 360 feet. About the first of the month he will begin to sink the shaft several hundred feet lower. Colonel John Doyle is hammering away at the Cinton and promises to surprise people some of these days with rich showings. This mine is developed by a tunnel L400 feet long, and it is said that \$28,000 has been spent in search of the copper that was never found. The Monitor mine will be started up again next week and one shaft will be sunk in the tunnel. up again next week and one shaft will be sunk in the tunnel. The Millside Mining company filed its

The Millside Mining company filed its articles of incorporation with the county recorder a few days ago. The incorporators are John D. Carpenter of Tunkhannock, Pa., and Charles E. Sawtelle and W. H. Young of Butte. The trustees for the first three months are J. E. Rickards, W. H. Young, Thos. F. Harney, J. D. Carpenter and E. J. Dimmick. The capital stock is \$500,000 in shares of \$1 each. The objects of the company, as its name indicates, are to own, sell, lease and operate all kinds of mining lands and industries. The company's term of existence shall be 29 years and the principal place of operation will be in Stiver Bow county. The main offlee of the corporation shall be in Butte, with a branch in Scranton, Pa. The Millside claim is located west of the Goldsmith.

A number of leasers are working on the surface of the Lexington, back of Centerville, and are taking out some good rock. It is reported that some \$1,000 ore is being taken out of the shaft back of the school house, which is being worked by Harris & Dunstan.

The Micawber mine, located near the

house, which is being worked by Harris & Dunstan.

The Micawber mine, located near the Parrot, has shut down, but work will probably be resumed before long.

A large number of men have been laid off at the Ragnsdell-Parrot on account of the rich ledge of ore which was discovered a short time ago having played out.

The repairs at the Lexington mill are about completed and 40 of the stamps will commence dropping to-morrow. The men who were laid off will be taken back to work as soon as the mill starts up.

The Butte Reduction works, which has been shut down for several weeks to allow of extensive repairs being made to the blast furnaces, will start up again on

blast furnaces, will start up again on Wednesday. Work at the Parrot has not yet been re-sumed and only the sinking crew are at work.

The only silver bar shipment of the week was six bars of Moulton.

WHEN UMPIRES DISAGREE.

The Row That Broke Up the Philipsburg-Special Dispatch to the Standard.

BOZEMAN, May 15 .- About 650 people attended the ball game here to-day, when the Philipsburgers and Bozemanites crossed bats for the second game of the season. The game opened up with Boze-man at the bat. For Bozeman in the first half of the sixth Porter hit the ball for one base, Keown hit to short, who retired Porter at second, Place took his base on balls and Keown was retired at second, and Adams then hit over the second baseman's head to centre. He reached second, Quivey fielded the ball to second and Gibson juggled it, and then came the dispute which terminated the game. In fumbling the ball Gibson dropped it to the ground. It struck the base and rolled off, the second baseman claiming that Adams kicked the ball, the ampire for Pailipsburg called Adams out and ordered Place, who had reached home in the meantime to return to third. Bozeman would not admit this and their umpire called on the teams to play ball, and though the Philipsburgs were in position with the catcher behind the bat and the pitcher in the box they refused to play unless the man Adams was called out and Place took third again. At the end of a minute which was given them to start the ball rolling again, the game was called nine to nothing in favor of Bozeman. The present umpire system will never be a success until such time as the umpires that are salaried are given full control with an uncerstanding as to which of the two umpires "am de boss," the home um-

pire or the visiting umpire.

It is to be regretted that the Philipsburgs did not bring an umpire with them, for as it was the manager had to do the umpiring and there never was so much kicking in two ball games in the state. The Philipsburgs are the strongest aggregation that ever visited our town and will be well to the front by the end of the season, though it would take but few such disgraceful seens as that of to-day to forever put a queeus on base ball in any town in the s ats. The matter must be remedied at once or the Montana state league will not be in existence many months. At the time of the dispute the score stood 12 to 6 in favor of Philipsburg.

A DR. JEKYL AND MR. HYDE.

Manager Oakes of a Dramatic Company Skips With Cash and a Pretty Woman. Pritshung, Pa., May 15.—Manager Oakes of the "Dr. Jekyl and Mr. Hyde" company now playing here, is missing, and with him the soubrette of the company, Marland Clark, and also the company's share of the receipts for the yester-day and last evening performances. It is not known which way the pair went or the amount he took with him.

Many May be Shot.

CHIHUAHUA, Mexico, May 15 .- Yesterday 65 prisoners implicated in the murder of Mayor Ancheta, at Ancension in January. were marched to the federal judge's offic to receive sentence. The prisoners' attorney made his final plen for them, and they were sent back to prison. They will be sentenced Monday and it is understood some 10 or 12 of them will be shot.

Deeming's Will. MELBOURNE, May 15 .- The will of Deeming bequeaths his goods and biography to his counsel. Lyle, except one-tenth of the proceeds, which goes to Miss Rounsevelle,

to whom Deeming was engaged when ar-

Specifications for Bids for Water Contract.

Bids are invited by the city of Butte, Mont., upon the following specifications:

Upon a system of water works to supply the city of Butte with water for fire purposes and for general use by the citizens of said city in an amount of not less than two million five hundred thousand gailons in each day of twenty-four hours, the water to be supplied to the said city to be pure and wholesome and from an unpolluted source, and to be carried in steel or from conduits from the source to point of distribution to be specified in the bid, and fit for household drinking and all domestic purposes, and to be supplied by direct pressure through steel or iron pipes or conduits, or by gravity from a reservoir or reservoirs to be located above the level of the said city of Butte at such an attitude as to give a continuous hydrostatic pressure of not less than sixty-five (65) pounds to the square inch from such reservoir or by direct pressure from any hydrant in any part of said city. And such reservoir or reservoirs shall have an aggregate capacity of not less than ten million gailons, and all of said system shall be required at any time to withstand the following test or tests within the fire limits of the diy of Butte:

To throw at one and the same time from any 10 hydrants in the said fire limits of the diy of Butte:

To throw at one and the same time from any 10 hydrants in the said fire limits in streams, each through 100 feet of hose and a one-inching nozzle, and to maintain during the flowing of said streams at the average center of the hydrants so flowing a hydrostatic pressure of not less than fifty (50) pounds to the square inch. The hydranis in be used and leased by the city shall not be less than 60, and shail be piaced at such on file in the office of the city of Butte, or any authorized officer of said city, said test or tests to be made whenever ordered by the said council.

All persons, companies or corporations but and will be required to show and specify at what rate Specifications for Bids for Water Contract.

years, and for a longer period, the city council to determine the time of the duration of the

consumers for all purposes for a period of five years, and for a longer period, the city council to determine the time of the duration of the contract.

The person or persons, company or corporation to whom the contract for the furnishing of water to the said city shall be let and awarded shall be required to have the entire system of water works completed and furnish the said city and all private consumers with water in accordance with the terms of their or its contract on or before the first day of January, A. 19, 1894.

All persons bidding upon these specifications and the specifications herein referred to, or seeking to enter into the said contracts with the said city for the furnishing of water, will be required to furnish and file with their bid a certified check in the sum of ten thousand (810,000) dollars, which shall be made payable to the city of Butte, and winch shall be and become for feited to and the property of the said city in the event that the person or persons, company or corporation to whom the said contract shall be awarded shall full or refuse to enter into a contract with the said city for the furnishing of water in accordance with the bid submitted by them, and commence work in good faith upon the censtruction of the system within thirty (30) days after the said contract has been awarded to them or it, and to enter into a good and sufficient bond with resident surelies of Silver Bow county, Mont, in an amount not exceeding the sum of two hundred thousand (800,000) dollars conditioned to save the said city harmless from any and all damages that it may sustain by reason of the construction, preparation for construction, operation and maintenance of said system of water works, and for the faithful and exact performance of all the conditions of said contract and for the faithful and exact performance of all the conditions of said contract and for the faithful and exact performance of all the conditions of said contract and for the faithful and exact performance of all the conditions of said
